

## COOL-FIT 4.0 fixed point

### Model:

- The product consists of two components namely electrofusion tapes and pipe brackets.
- Electrofusion welded tape as permanent connection to transmit the forces that occur in the pipe to the fixed point.
- The delivered pipe brackets are needed to deliver welding pressure during installation and give stability during operation.
- For welding, use an MSA2.x, MSA4.x, MSA 250, 300, 350, 400 or commercially available 220 V fusion machines.
- If you use an MSA fusion machine from GF Piping Systems, use the 799 350 339 adapter or the 790 156 032 y-cable set.
- Please take note of the maximum allowed forces for this version in the table below.
- **Fixed point brackets and cross braces have to be calculated and obtained by the installer. They are not included in the fixed point set from GF.**

| D<br>(mm) | d<br>(mm) | Code               | SP | Weight<br>(kg) | L<br>(mm) | H<br>(mm) | max Force<br>(kN) | Closest inch<br>(inch) |
|-----------|-----------|--------------------|----|----------------|-----------|-----------|-------------------|------------------------|
